## October 2020 Programs

**Tuesday, October 13 9:30 – 11:30 a.m. – Board Meeting**

**Tuesday, October 13 1:00 p.m.**

**DNA - “LEEDS METHOD” Presenter: Greg Liverman, Pinewood Genealogy**

This lecture is for people who are familiar with looking at their matches at Ancestry or another company, who understand how autosomal DNA is inherited, who understand “centimorgans”, who understand how to translate a 250 cM match into “2nd cousin”, etc. However, even people who are just beginning with DNA analysis will take away information that will help them in their research. We will spend the majority of the time looking at manual color clustering of your matches (The Leeds Method), but will also review the automatic clustering tools.

**Tuesday, October 20 1:00 p.m.**

**RESEARCHING NEWSPAPERS Presenters: Barbara Elliott, CGHS**

Have you ever wondered what information you can find in old newspapers? Come join this fun and informative class while we discuss the use of newspapers. As I read through the book “The Family Tree Historical Newspapers Guide” by James M. Beidler, I realize what an invaluable tool newspapers of old are. If there was a newspaper printed in the area in which your ancestors lived, they might have been recorded in it in some way. Whether buying property, witness to a crime, births, deaths, etc., these old newspapers hold a wealth of information.
